

MPPT LI-ION CN3791 CHARGER BOARD

DESCRIPTION

Introducing our new MPPT Li-Ion charger, your all-in-one solution for efficient and reliable battery charging using solar energy! Whether you're a hobbyist tinkering with electronics or a professional in need of a compact charging solution, this board will make things easier.

On board is the CN3791 which provides sophisticated charging algorithms tailored to Li-Ion batteries, ensuring precise control over the charging process for maximum efficiency and safety. Next to it, there are quick terminals with springs on the board for an even simpler and faster connection of the solar panel and battery. There is also a JST connector for connecting all li-ion batteries from our offer.

FEATURES

- IC: CN3791
- Dimensions: 54 x 38 mm / 2.1 x 1.5 inch
