Features

1. Supports High-Voltage

Rated Voltage : 1,000V AC/DC
Withstanding Voltage : 3,000V AC

Housing Design ensures sufficient creepage and spatial distance between contacts, allowing for high rated and withstanding voltages in a compact form.

2. Electric Shock Prevention Design

The depth of the design provides electric shock protection, thereby enhancing assembly safety.

3. High Heat Resistance up to 125°C

- Can withstand temperatures up to 125 degrees, suitable for automotive and other high-heat applications.

Note: Temperature ratings include the rise due to current flow.

4. High Vibration Resistance

- Female contact features an innovative three-point contact design.
- Double-layered spring enhances stability
- Designed to maintain contact under intense vibrations, improving reliability.

① Double-Layered Spring Design

Provides superior vibration resistance and contact reliability.

② 3-Point Contact Design

Withstands severe vibration due to improved contact reliability.
1 Spring + 2 Embossed Contact Points = 3-Point Contact Design

5. Mating Key Design Prevents Incorrect Insertion.

Prevents incorrect insertion, ensuring proper alignment.

- Mating Keys : Standard (Black) and A (Orange), Two Key Types
